

At the end of transmission BCM cal CS and ack App
Callback is the mainfunction of BCM manager

Second Approach using timer

$$DR = (500 * 1024) / (8) = 64000B/sec$$

$$P = (2000) / (64000) = 31.25 \text{ ms}$$

App call mainfunction at constant rate

At the end of transmission BCM cal CS and ack App
